

THINK GREEN

Adopting green business practices means conserving resources and reducing waste and pollution. From greening your supply chain to offsetting your carbon output. Successful Green companies must focus on customers, employees, neighbors, the environment and profits.

Blaze Products has been a leader in the chafing fuel industry for over 25 years and is proud to be an environmentally responsible company. From Sourcing Raw Materials, through Manufacturing and Delivery of our finished product – Blaze continues to focus on our customers, employees, neighbors, and the environment. We have listed a few examples below:

-  **BLAZE Jelled Ethanol is made with All Natural Products.**
-  **BLAZE produces the only embossed seamless 100% Recyclable aluminum can.** In addition to being 100% recyclable, this means less shipping weight, easier to handle, and less transportation cost. It also means rust free cans that are never unmarked and no danger of welds or seams that might split, spilling flammable materials.
-  **BLAZE Jelled Ethanol is produced from reclaimed (recycled) ethanol. Our fuel is Environmentally Friendly using Sustainable Resources.**
-  **BLAZE Jelled Ethanol (200-proof) formula has the highest BTU's.** We reach the boiling point faster than any other canned fuel.
-  **BLAZE produces the only traditional (organic) jelled chafing dish fuel.** BLAZE is clean burning with no offensive odor to spoil food. This means an enjoyable buffet experience for the customer and repeat business for the operator.
-  **BLAZE products are made in the U.S. from raw materials produced in the U.S.**
-  **BLAZE is the only ISO 9000 certified fuel manufacturer.** This assures our customers of product reliability, highest quality and consistency - in every can.

Blaze Jelled Ethanol is an environmental friendly ethanol based heating/cooking fuel that burns cleaner, hotter and more efficiently than other products on the market. It is Smokeless, Odor free, Non-toxic, and produces no harmful emissions.

See what sets us apart in fuel and safety

BLAZE Products burn hotter and last longer. Reduce your fuel costs and increase your heat hour by hour with BLAZE!

Jelled Methanol: This is the most cost efficient fuel on the market. BTU per Hour per Can: 1430

Stock #	Size	Approx. Burn Time	Pack	Cube	Weight	Cs/Pallet
GB100	7 oz.	2.0 hr.	72	1.3	35.8	56
GB200	Gallon	-	4	0.8	32.1	63
GB300	7 oz.	2.0 hr.	24	0.4	12.4	72
GB400	2 5/8 oz.	45 min.	144	1.1	29.5	56
GB500	7 oz.	2.0 hr.	48	0.7	24.2	63
GB650	7 oz.	2.0 hr.	12	0.2	5.7	187

Jelled Ethanol: This is the hottest and longest burning ethanol fuel on the market. BTU per Hour per Can: 1630

Stock #	Size	Approx. Burn Time	Pack	Cube	Weight	Cs/Pallet
BB100	7 oz.	2.0 hr.	72	1.3	35.8	56
BB200	Gallon	-	4	0.8	32.0	63
BB400	2 5/8 oz.	45 min.	144	1.1	29.0	56

Liquid Diethylene Glycol (DEG): This fuel is non-flammable and will not evaporate. BTU per Hour per Can: 890

Stock #	Size	Approx. Burn Time	Pack	Cube	Weight	Cs/Pallet
LB300	8 oz.	5.5 hr.	24	0.8	15.9	96
LB700	6 oz.	4.0 hr.	24	0.8	13.5	96
SB300	8 oz.	5.5 hr.	24	0.8	17.0	96
SB700	6 oz.	4.0 hr.	24	0.8	14.0	96
CW300 Clearwick	8 oz.	5.5 hr.	24	0.8	15.9	96
TF700 Matrix 5.5 hours	8 oz.	5.5 hr.	24	0.8	15.9	96
TF500 Hot 3 hours	7.5 oz.	3.0 hr.	48	1.0	31.8	70
